Summary

I am a Software Engineer experienced in utilizing programming languages such as Java, Golang, Python, and C to develop robust solutions. With a strong foundation in software development, I am well-equipped to tackle a wide range of challenges. Additionally, I have expertise in DevOps engineering, utilizing tools like Terraform and Kubernetes to streamline deployment processes. I am proficient in working with cloud services such as AWS.

Work Experience

Traveloka

South Tangerang

Backend Infrastructure Engineer

April 2024 - Now

Backend Infrastructure Engineer responsible for implementing infrastructure solutions to improve system efficiency, maintainability, and security. I'm actively contributing to projects such as upgrading services to Java 21 and Spring Boot 3 to improve performance, long-term support, and framework compatibility, migrating CI/CD pipelines from AWS CodeBuild & CodePipeline to GitHub Actions to reduce infrastructure overhead and streamline deployment processes, and implementing RDS IAM Authentication to enhance database security across Traveloka services.

Jatis Mobile

Jakarta

Software Engineer

May 2023 - April 2024

Contributed to the development and maintenance of back office applications in a fast-paced, multi-industry tech environment. Collaborated with cross-functional teams to deliver client-requested features using PHP (Laravel) and Go (Echo, Gin). Successfully applied Domain-Driven Design (DDD) principles to enhance application architecture and ensure timely delivery across diverse development projects.

Traveloka

South Tangerang

Backend Engineer Intern

August 2022 - December 2022

Joined the Infrastructure team to optimize AWS resource usage. Successfully reduced operational costs by migrating services from EC2 to ECS using Terraform, delivering a more cost-efficient and scalable infrastructure solution.

PT. PAL

Surabaya

Web Developer Intern

October 2021 - January 2022

Developed an online internship registration system for the Human Capital Management division using Laravel, enabling students to apply digitally instead of on-site. The platform streamlined the application process.

Education

Politeknik Elektronika Negeri Surabaya

Surabaya

Bachelor of Applied Science in Informatics Engineering

July 2019 - Sept 2023

Technologies & Languages

- **Languages:** Java, Golang, Python, C, C++, PHP, Bash Shell Script
- **Technologies:** AWS, Docker, Terraform, Kubernetes, Postgres, Git, Datadog, SpringBoot
- **Other:** Data Structure & Algorithm, IaC, Microservices, CI/CD, SDLC
